ADDITIONAL ROS: Info: Except as noted in the above Review of Systems and in the History of Present Illness, all other systems have been reviewed and are negative or noncontributory. Gave patient opportunity to voice any additional symptoms other than those listed above and there were no additional symptoms verbalized.

Physical Exam

Vitals & Measurements

T: 36.3 °C (Temporal Artery) **HR:** 108 **RR:** 18 **BP:** 129/98 **SpO2:** 98%

HT: 165 cm **WT:** 105 kg **BMI:** 38.57

Medical Decision Making

Differential diagnosis includes arthritis, rheumatoid arthritis, muscular pain

--I have looked at previous external notes on patient from previous ed visits and office visits

--History was obtained from patient only no independent history from spouse etc.

--I have ordered not labs and reviewed them and have gone over results with the patient
